Paying with Binance Chain (BEP20) 5

Paying with Ethereum (ERC20) 6

Paying with Tron (TRC20) 7

Paying with Solana (SPL) 8

# How to

Make sure to follow these rules when accepting cryptocurrency.

1

### Network

It is extremely important to confirm which network you are using. Sending and receiving networks **must be consistent.**

2

### Cryptocurrency

Make sure that the correct cryptocurrency has been selected.

3

### Amount

Make sure the customer sends through the exact crypto amount as shown on the ePOS,

4

### Receipts

Always make sure to wait for the receipt before releasing stock to the customer

# Accepting Cryptocurrency Payments is ezee

Select Cashier Pro → Enter Amount → Select Network

bitcoin Mainnet

# If Bitcoin Mainnet

Display QR Code to the Customer → Input exact BTC amount.

- Transactions can take up to 30 mins depending on gas fee.
